SIGNALTRACE

— POWERED BY TECHVELOCITY.AI

FOR MOVEMENT DISORDER CLINICS

Objective tremor scoring.

SignalTrace scores an Archimedean spiral and a short video against the Clinical Rating Scale for Tremor.

HOW IT WORKS

01 CAPTURE
In-clinic or remote video assessment

02 SCORE
Against CRST, reasoning shown

03 RECORD
FHIR R4 observations and reports

04 TRACK
One score per session, comparable between visits

KEY HIGHLIGHTS

ONE CRST SCORE PER SESSION
Consistent between visits

FHIR R4
Observations and reports

PER-PATIENT TREND
Every session on one axis

COHORT VIEW
Across the clinic

REMOTE INGESTION
Request video assessments remotely
